EASY TO CLEAN

In a recent Good Housekeeping survey, the fact that Aluminum is "Easier to Clean" rated first among women's reasons for preferring Aluminum.

LIGHT — BUT STRONG

Easier to handle; yet quality Aluminum Utensils are so strong and durable that they last indefinitely.

SUPERIOR HEAT-CONDUCTIVITY

Aluminum conducts heat approximately three times faster than other commonly used materials. This rapid conductivity spreads heat quickly, more evenly throughout an entire utensil, avoiding hot spots. For instance, a pint of milk can be boiled down to one-quarter pint, over low heat, without stirring — and it won't scorch. In baking and roasting utensils this rapid spreading of heat results in evener browning. Because of Aluminum's low emissivity and superior conductivity, less heat is required.

ALUMINUM IS "FRIENDLY TO FOOD"

Aluminum cannot possibly change the natural color, flavor or wholesomeness of foods. And as for foods containing vitamin C (as milk), Aluminum is absolutely without effect on healthful vitamin potency.

GOOD HOUSEKEEPING SAYS:

"Good Housekeeping has investigated thoroughly the matter of absorption of Aluminum from cooking utensils, both as to extent and to possibility of toxic amounts, and we believe there is absolutely no danger from the use of such ware. Aluminum cooking utensils have been pronounced harmless by the Hygienic Laboratory of the United States Public Health Service, and other organizations devoted to the public good."

PLUS ADVANTAGES OF

1. Pioneers in creating new utensils and improving old.
2. Always the latest features in cooking utensils.
3. Variety of finishes.
4. With rolling mills we control quality of our sheet.
5. Complete line of cooking utensils.
6. Complete advertising cooperation:
   - National magazine advertising
   - Trade journal advertising
   - Store and window display material
   - Mailing circulars
   - Suggested advertising layouts
   - Catalog pages and listings
   - Trained artists and advertising experts
7. Merchandising services such as:
   - Seasonal campaigns
   - Coupon specials
   - Demonstration allowances on specialties
8. World's largest manufacturers of aluminum cooking utensils.

STAR FEATURES OF MIRRO UTENSILS

MIRRO features such as knobs, beads, spouts, and trimmings make a great deal of difference in the work of the housewife who has to cook "three squares per day." These MIRRO Star Features are important things women look for when buying aluminum ware:

1 MIRRO is furnished with a new, large, easy-grip knob. Designed for beauty and convenience. Made of plastic to meet the particular needs of each utensil, this "plus" feature adds a note of extra quality women will quickly set as a standard.

2 Seamless: A smooth, unbroken line between the exclusive MIRRO Sani-Tite Rim and the side of the pan. A wipe and it's clean. No place here for dirt and grease to collect.

3 Modern extra heavy dome covers give added space to the utensil when cooking bulky foods. Special recessed shoulders allow cover to rest snugly within utensil which helps prevent food boiling over. Seamless, one piece construction makes MIRRO covers easy to clean.

4 The utmost utility is built into MIRRO utensils. Accurate, self-measuring graduations save time and steps and eliminate guesswork — another example of MIRRO conveniences.

5 All MIRRO Cooking Utensils are Sun-ray finished inside — beautiful and very easy to clean. The brilliantly polished outside surfaces blend to give MIRRO eye appeal. Handles are positioned to give perfect balance.

6 MIRRO Tea Kettles are conveniently filled through sanitary welded spouts. No crevices or seams to catch dirt. The Tea Kettle is in reality one complete piece.

7 Smoothly rounded corners for convenient stirring and easy cleaning. MIRRO is made of thick, especially hardened aluminum that will give years of excellent and economic service.

For Superiority in Pressure Cooking

MIRRO-MATIC
PRESSURE PANS

MIRRO-MATIC CONTROL *Automatically*
LIMITS PRESSURE TO YOUR SELECTION...5, 10, or 15 LBS.

5 lbs. *the correct pressure for cooking frozen vegetables. Average time about 2 minutes.*

10 lbs. *the correct pressure for cooking meats; 3 times faster than ordinary cooking methods.*

15 lbs. *the correct pressure for most fresh vegetables. Try the 3-minute vegetable plate.*

CANNING *with approved pressures . . . for fruits, 5 lbs. . . . for vegetables and meats, 10 lbs.*

3 Popular Sizes . . . 4-6-8 Quart MIRRO-MATIC PRESSURE PANS

Polished; inside sun-ray finish. Satin finished bottom. Smooth rounded corners, easy to clean. Thick gauge, new special hard aluminum alloy. Husky construction throughout. New type easy cleaning gasket seals and locks cover automatically whenever pressure is on. Aluminum rack for use in canning, preparation of meats and certain vegetables. AUTOMATIC Pressure Control provides choice of 5, 10 or 15 pound cooking pressure. Heat-proof plastic handles and side grip on all sizes. Recipe folder with directions and timing chart, extra safety fuse and cleaning wire included.

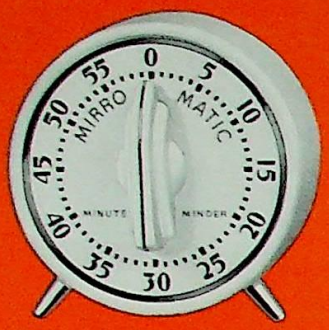
All sizes one in corrugated shipping carton. Trade-marked and labeled.

MIRRO
THE FINEST ALUMINUM

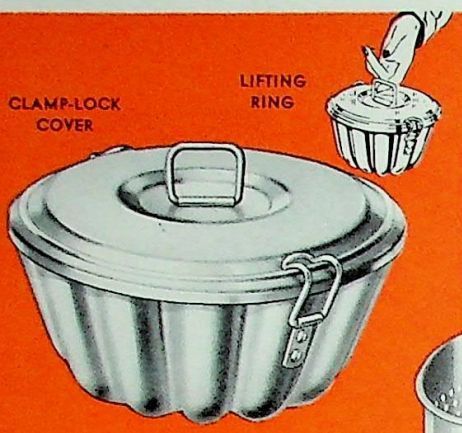


MIRRO-MATIC MINUTE MINDER

A great aid in: pressure cooking, timing percolator, developing film, timing eggs, oven foods, waffles, etc.

Heavy metal case, attractively finished in durable, white enamel. White face with red numerals; white plastic pointer with polished metal inlay. Requires no winding, just set pointer and timer rings when period is up. 3" high.

301-M Pkg. Unit 3 only, Wt. Pack. Unit 2½ lbs.



MIRRO COVERED MOLD

Fits 4, 6 & 8 Qt. pressure pans. Ideal for puddings, brown bread and fruit cake. Also excellent for casseroles and pressure cooking rice, cereals, leftovers. Mold can be used for gelatin salads. Clamp-lock cover and handy lifting ring. Seamless and sanitary. Stain-resisting Alumilite finish. 20 Gauge.

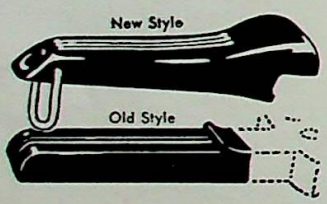
381-AM Capacity 1⅛ Qts. Pkg. Unit 6 only, Wt. 3¾ lbs. Capacity 8 oz. cups 4½.

MIRRO-MATIC TWINSET PANS

Fits most 4-Qt. and larger pressure pans. For cooking two vegetables at a time—flavor will not intermingle. Adjustable bails lock securely in upright position. Stain-resisting Alumilite finish. Two-color display box. 18 Gauge.

382-AM Capacity each pan 1 qt., Pkg. Unit 4 sets, Wt. Unit Pack. 3½ lbs.

MIRRO-MATIC REPLACEABLE PARTS



COVER HANDLE

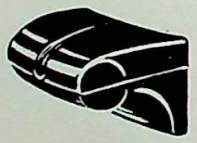
High heat-resistant Plastic.

8891-S—New style for 4 qt. Will not fit old style sockets.

8889-S—Fits old style 4 qt.

8890-S—Fits 6 & 8 qt.

6 wrapped, shpg. wt. 2 lbs. (Any style).



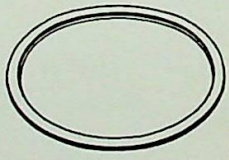
SIDE GRIP

High heat-resistant Plastic.

2583-S—Fits 4 qt. only.

2599-S—Fits 6 & 8 qt. only.

Minimum Packing 6 only. Shpg. wt. 2 lbs.



GASKET

Molded Neoprene.

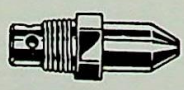
9896-S—Fits 4 qt. 6 in box. Shpg. wt. 2 lbs.

9891-S—Fits 6 & 8 qt. 6 in box. Shpg. wt. 2½ lbs.

CONTROL

Solid stainless steel. 5-10-15 lb. pressure.

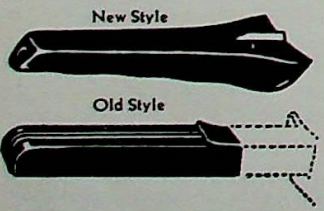
9898-S—One in envelope. Shpg. wt. ⅓ lb.



VENT TUBE

Machined from solid stainless steel. Fits all sizes.

9894-S—One in envelope. Shpg. wt. 1½ oz.



PAN HANDLE

High heat-resistant Plastic.

8891-AS—New style for 4 qt. Will not fit old style sockets.

8889-AS—Fits old style 4 qt.

8890-AS—Fits 6 & 8 qt.

6 wrapped, shpg. wt. 2 lbs. (Any style).

SAFETY FUSE

Fusible alloy. 12 on display card. Fits all sizes.

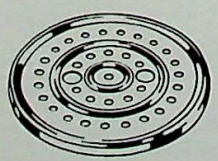
9888-S—Shpg. wt. 1 lb.

INSTRUCTIONS

Has directions time charts, recipes, etc.

9897-S—For 4 qt. Shpg. wt. 4 oz.

9886-S—For 6 & 8 qt. Shpg. wt. 7 oz.



RACK

Extra hard aluminum.

9895-S—Fits 4 qt. 12 wrapped 6 lbs.

9887-S—Fits 6 & 8 qt. 12 wrapped, 7½ lbs.

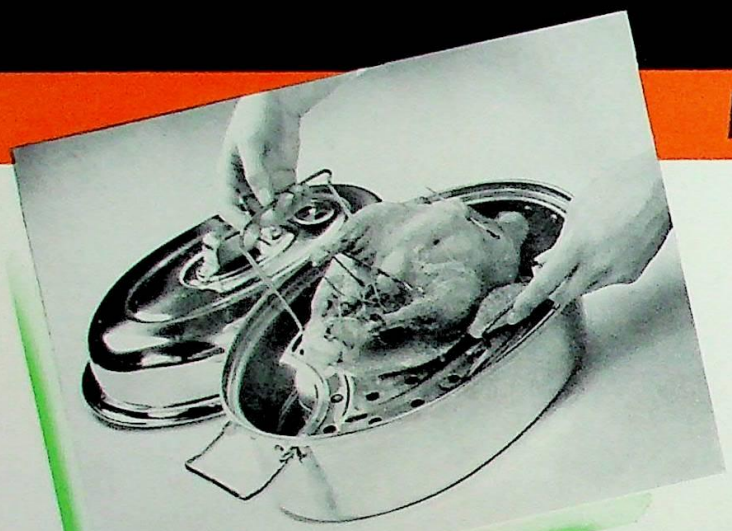
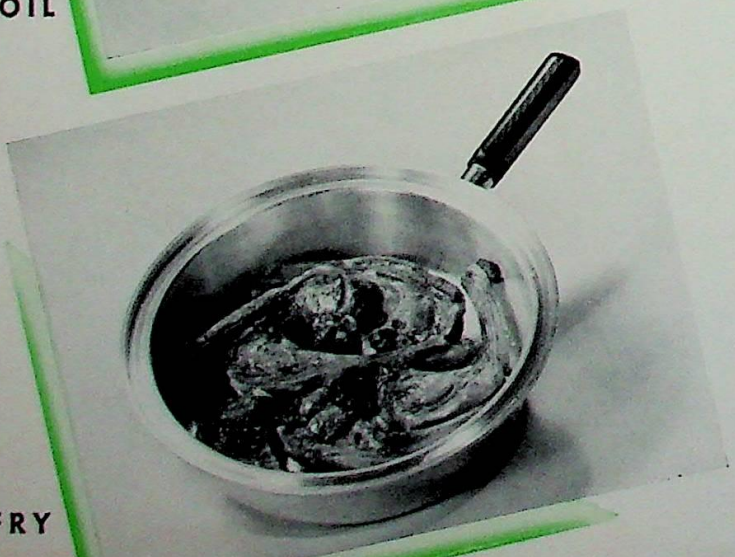
A Correct Utensil for Every Type of MEAT PREPARATION

MIRRO The Finest Aluminum



ROAST

BROIL



FRY

Nowadays much of the guess work has been taken out of meat cookery. Given the proper equipment—like MIRRO Aluminum utensils which distribute heat evenly, and a roasting thermometer—any homemaker can achieve success.

Cookery methods have changed a great deal in the last few years. No longer do Home Economists recommend the roasting of meat at high temperatures. Also, how and when to use open or covered roasters is now a matter of common knowledge.

All these changes have been anticipated by our MIRRO Test Kitchen and built into MIRRO ware by our trained designers.

Broiling, roasting, frying, baking, braising—there is a MIRRO utensil especially suited for every type of meat preparation. Leading food specialists, practical homemakers and hungry households are enthusiastic in their praise of such MIRRO utensils as the Griddle Grill, Do-All Roaster, Broilers, Fry Pans and French Fryers.

MIRRO ware conducts heat quickly and evenly; there are no "hot spots"; food is less likely to stick or scorch and you have better tasting food prepared in less time. These are but a few of the reasons why countless housewives buy and use MIRRO ware.

HEATS EVENLY

SEAMLESS RUSTPROOF EASY TO CLEAN

STAIN-RESISTING ALUMILITE FINISH

MIRRO UTENSILS

for Better Baking

Aluminum is the ideal utensil material for baking because it heats quickly and browns evenly.

★ Superior Heat Conductivity. Aluminum conducts heat approximately three times faster than other commonly used materials. This rapid spreading of heat gives distribution throughout an entire utensil, avoiding "hot spots." For instance, a pint of milk can be boiled down to one-quarter pint, over low heat, without stirring — and it won't scorch. In baking utensils this rapid spreading of heat gives a more beautiful, evener browning. It holds heat in. Because of Aluminum's superior heat conductivity, less heat is needed, thus reducing fuel costs.

★ MIRRO Baking Ware Cleans Easily. Because of the rapid heat conductivity aluminum baking ware is not apt to scorch or cause foods to stick. Rounded corners and seamless construction offer no places where food particles can lodge. The hard, smooth surface of aluminum makes it simple to clean after each use and easy to keep silvery bright.

★ MIRRO Aluminum Mixing Bowls, Pie Plates, Bread Pans, Biscuit Pans and Molds feature stain-resisting Alumilite finish. This is a patented finish, not a plating, resulting actually in a change in the surface structure of the aluminum which prevents discolorations, and more especially, heats 30% faster.

MIRRO Layer Cake Pans

Aluminum is ideal for baking. Seamless. Stay bright, heat quickly and brown evenly—leak-proof batter-seal loose bottoms. Tapered sides permit nesting—save cupboard space. Conform to recommendations of American Standards Association for ready mix cakes. Sanitary square bead.
